

# Junehyoung Jeon

junehyoungjeon@utexas.edu

<b>Research Interests</b>	I am interested in how the early Universe and its components such as galaxies and black holes evolved. I approach these problems creating/using theoretical models and hydrodynamical simulations to study early structure formation.	
<b>Education</b>	<i>Doctor of Philosophy in Astronomy</i>	Expected completion 2026
	Astronomy Department, University of Texas at Austin, Austin, Texas	
	<i>Master of Arts in Astronomy</i>	August 2023
	Astronomy Department, University of Texas at Austin, Austin, Texas	
	<i>Bachelor of Science in Astrophysics, Minor in Physics</i>	May 2021
	Barrett Honors College, Arizona State University, Tempe, Arizona	
	Average unweighted GPA: 4.0/4.0	
<b>Publication</b>	<b>Jeon, J.</b> et al. (2025). <i>The Emerging Black Hole Mass Function in the High-Redshift Universe</i> . The Astrophysical Journal, Volume <b>988</b> , Issue 1, 15 pp.

<b>Conference Talks</b>	<i>The Emerging Black Hole Mass Function in the High-Redshift Universe</i> Cosmic Frontier Center Inaugural Conference, Austin, United States	
	May 2025	
	<i>Physical Pathways for JWST-Observed Supermassive Black Holes in the Early Universe</i> CRISOL25, Toledo, Spain (remote)	
	May 2025	
	Probing the Genesis of SMBH, Kashiwa, Japan (remote)	
	November 2024	
	CCA-CFC Workshop, Austin, United States	
	November 2024	

<i>Conditions for Efficient Growth of Supermassive Black Holes in the Early Universe</i>	July 2024
COSPAR 2024, Busan, South Korea	
Massive Black Holes in the First Billion Years, Kinsale, Ireland	April 2024

<i>Observability of Low-Luminosity AGN in the Early Universe with JWST.</i>	
Black Holes on Broadway, New York City, United States	December 2023
Young Astronomers on Galactic Nuclei, Palermo, Italy	October 2023

<b>Awards and Honors</b>	Graduate Summer Excellence Award, UT Austin (\$9000)	2025
	Board of Visitors Graduate Student Endowment Fund (\$10000), UT Austin	2023
	Professional Development Award, UT Austin (\$500)	2023
	The College of Liberal Arts and Sciences Dean's Medal, ASU	2021
	Moeur Award, ASU Alumni Association	2021
	New American University Award (\$5000)	2018-2021
	The College of Liberal Arts and Sciences Dean's List, ASU	2018-2021

<b>Teaching</b>	<i>Teaching Assistant</i> , University of Texas at Austin: Astrophysics	Spring 2025
	<ul style="list-style-type: none"> <li>Assisted astronomy and physics major upper class students with assignments and projects, helping their understanding of the lecture concepts and applications.</li> <li>Prepared and taught introductory python modules designed for students who have no prior experience, introducing them to the basics of coding in astrophysics.</li> </ul>	

*Teaching Assistant*, University of Texas at Austin: Practical Introduction to Research  
Spring 2024, Fall 2021

- Guided astronomy and physics major students through in-class activities such as coding, writing resume, and making posters, providing them with introductory skills in academia.
- Prepared coding and lecture modules for the students, leading the students to understand the concepts.

<i>Teaching Assistant</i> , University of Texas at Austin: Cosmology	Fall 2022
--	-----------

- Explained course topics to students after class, helping them individually to grasp lecture concepts that they might not have fully understood.
- Guided students through their homeworks, assisting them in understanding questions and steps to solve various cosmology problems.

<i>Tutor</i> , Arizona State University School of Earth and Space Exploration: Introduction to Astrophysics and Cosmology II	Spring 2021
--	-------------

- Participated in the live classes to answer the questions students asked, aiding the instructor in the lectures
- Graded assignments with feedback, helping students better understand the problems and their mistakes
- Created visual figures that demonstrated important topics in cosmology, easing the students' understanding of the topics

<i>Learning Assistant</i> , Arizona State University Physics Department: Science of Musical Instruments, University Physics I Mechanics, University Physics II Electricity and Magnetism	Fall 2019 - Spring 2021
--	-------------------------

- Participated in three physics courses as a sub-instructor
- Aided students during in-class problems, activities and questions regarding homework or exam problems

## Research Experiences

*Studying galaxies at  $z \sim 6$*   
 Arizona State University  
 Dr. Rogier Windhorst

August 2019 - May 2021

- Modeled 53 galaxies using the CIGALE code for SED modeling and determined 47 with valid models with data from previous papers and also extracted data from SDF K-band to add flux data points to the models
- Analyzed the models to determine the fraction of high escape fraction galaxies around  $z = 6$  and concluded on their significance on reionization

*JWST Cycle-1 Proposed Program: NIRSpec/IFU Observations of Luminous Galaxies at  $5.7 < z < 6.6$*

August - October 2020

University of Arizona  
 Dr. Eiichi Egami

- Worked as a co-investigator and performed realistic simulations of Near Infrared Spectrograph (NIRspec) with the Exposure Time Calculator (ETC) to predict JWST observations of extremely blue galaxies that couldn't be modeled accurately so far
- Created figures showing the model and simulated spectra of the galaxies along with their images to be put in the proposal and improve the case for observing these galaxies

## Skills

Programming: Python, C, Fortran, High Performance Computing  
 Operating systems: Windows, Linux  
 Software: LaTeX, Mathematica  
 Languages: English, Korean
