|---------------------------|--|--------------------------|
| Research Interests | I am interested in how the early Universe and its components such as galaxies and black holes evolved. I am further interested in creating/using theoretical models and hydrodynamical simulations to study early structure formation. | |
| Education | <i>Doctor of Philosophy in Astronomy</i> | Expected completion 2026 |
| | Astronomy Department, University of Texas at Austin, Austin, Texas | |
| | <i>Master of Arts in Astronomy</i> | August 2023 |
| | Astronomy Department, University of Texas at Austin, Austin, Texas | |
| | <i>Bachelor of Science in Astrophysics, Minor in Physics</i> | May 2021 |
| | Barrett Honors College, Arizona State University, Tempe, Arizona | |
| | Average unweighted GPA: 4.0/4.0 | |
| Publication | Taylor, A., Finkelstein, S., Kocevski, D., Jeon, J. , et al. (2024). <i>Broad-Line AGN at $3.5 < z < 6$: The Black Hole Mass Function and a Connection with Little Red Dots</i> . Submitted to the Astrophysical Journal. arXiv:2409.06772 | |
| | Jeon, J. et al. (2024). <i>Physical Pathways for JWST-Observed Supermassive Black Holes in the Early Universe</i> . Submitted to the Astrophysical Journal. arXiv:2402.18773 | |
| | Jeon, J. et al. (2023). <i>Observability of Low-Luminosity AGN in the Early Universe with JWST</i> . Monthly Notices of the Royal Astronomical Society, 524 , 176-187 | |
| | Jeon, J. et al. (2022). <i>Maximal X-ray feedback in the pre-reionization Universe</i> . Monthly Notices of the Royal Astronomical Society, 515 , 5568-5575 | |
| | | |
| Conference Talks | <i>Conditions for Efficient Growth of Supermassive Black Holes in the Early Universe</i> | |
| | COSPAR 2024, Busan, South Korea | July 2024 |
| | Massive Black Holes in the First Billion Years, Kinsale, Ireland | |
| | | April 2024 |
| | | |
| | <i>Observability of Low-Luminosity AGN in the Early Universe with JWST</i> | |
| | Black Holes on Broadway, New York City, United States | December 2023 |
| | Young Astronomers on Galactic Nuclei, Palermo, Italy | October 2023 |
| Awards and Honors | Board of Visitors Graduate Student Endowment Fund, UT Austin | |
| | | 2023 |
| | Professional Development Award, UT Austin | |
| | | 2023 |
| | The College of Liberal Arts and Sciences Dean's Medal, ASU | |
| | | 2021 |
| | Moeur Award, ASU Alumni Association | |
| | | 2021 |
| | New American University Award(\$5000) | |
| | | 2018-2021 |
| | The College of Liberal Arts and Sciences Dean's List, ASU | |
| | | 2018-2021 |

| | | |
|-----------------------------|---|-------------------------|
| Teaching | <i>Teaching Assistant</i> , University of Texas at Austin: Practical Introduction to Research Spring 2024, Fall 2021 | |
| | <ul style="list-style-type: none"> • Guided students through in-class activities such as coding, writing resume, and making posters, providing them with introductory skills in academia. • Prepared coding and lecture modules for the students, leading the students to understand the concepts. | |
| | <i>Teaching Assistant</i> , University of Texas at Austin: Cosmology | Fall 2022 |
| | <ul style="list-style-type: none"> • Explained course topics to students after class, helping them individually to grasp lecture concepts that they might not have fully understood. • Guided students through their homeworks, assisting them in understanding questions and steps to solve various cosmology problems. | |
| Research Experiences | <i>Tutor</i> , Arizona State University School of Earth and Space Exploration: Introduction to Astrophysics and Cosmology II | Spring 2021 |
| | <ul style="list-style-type: none"> • Participated in the live classes to answer the questions students asked, aiding the instructor in the lectures • Graded assignments with feedback, helping students better understand the problems and their mistakes • Created visual figures that demonstrated important topics in cosmology, easing the students' understanding of the topics | |
| | <i>Learning Assistant</i> , Arizona State University Physics Department: Science of Musical Instruments, University Physics I Mechanics, University Physics II Electricity and Magnetism | Fall 2019 - Spring 2021 |
| | <ul style="list-style-type: none"> • Participated in three physics courses as a sub-instructor • Aided students during in-class problems, activities and questions regarding homework or exam problems | |
| Research Experiences | <i>Studying galaxies at $z \sim 6$</i> | August 2019 - May 2021 |
| | Arizona State University Dr. Rogier Windhorst | |
| | <ul style="list-style-type: none"> • Modeled 53 galaxies using the CIGALE code for SED modeling and determined 47 with valid models with data from previous papers and also extracted data from SDF K-band to add flux data points to the models • Analyzed the models to determine the fraction of high escape fraction galaxies around $z = 6$ and concluded on their significance on reionization | |
| | <i>JWST Cycle-1 Proposed Program: NIRSpec/IFU Observations of Luminous Galaxies at $5.7 < z < 6.6$</i> | August - October 2020 |
| Research Experiences | University of Arizona Dr. Eiichi Egami | |
| | <ul style="list-style-type: none"> • Worked as a co-investigator and performed realistic simulations of Near Infrared Spectrograph (NIRspec) with the Exposure Time Calculator (ETC) to predict JWST observations of extremely blue galaxies that couldn't be modeled accurately so far • Created figures showing the model and simulated spectra of the galaxies along with their images to be put in the proposal and improve the case for observing these galaxies | |

Skills

Programming: Python, High Performance Computing
Operating systems: Windows, Linux
Software: LaTeX, Mathematica
Languages: English, Korean
